

TECHNICAL BULLETIN

OSKAR'S M-700 MOULD RELEASE WAX PASTE

Stand: 18.02.2022

General:

M-700 is a solid emulsion of pure carnauba wax in hydrocarbon solvents and water. It forms a very hard and resistant coat on mould surfaces resulting delayed formation of styrene/wax residues (wax-built-up) and avoid pre-release causing high costs of working.

M-700 does not contain silicone.

Properties:

Appearance:	pasty
Colour:	beige
Odour:	characteristic
Specific Gravity:	~ 0,88 g/cm ³ at 20°C
Flashpoint:	> 65°C

Comments:

M-700 is one component our **OSKAR'S MOULD RELEASE AND MAINTENANCE SYSTEM**. More detailed information regarding this system can be supplied upon request. This documentation describes the application of **M-700** as well as the other parts of this system.

Storage:

M-700 has a shelf life of at least 24 month if stored in its original, unopened containers in a dry and cool place. Avoid freezing and prolonged temperatures above 30°C (86°F).

Note: Safety data sheet available on request.

The data given above are based on current knowledge and experience. The data do not signify any warranty.
